A passionate Web3 enthusiast and developer, currently pursuing a degree in Information and Finance Management at Taipei Tech in Taiwan. My interests encompass DevOps, Blockchain technologies (EVM, Cosmos SDK, Bitcoin), AI, Linux, and Python. Primarily based in Taipei and Macao.

Education

Yuet Wah College, Macau

Chinese Department, students of liberal arts

2014 - 2020

National Taipei University of Technology (Taipei Tech), Taipei, Taiwan

Degree: Bachelor of Science, Major in Information and Finance Management

2020 - 2024

Web3 Experience

- Spearheaded the management and **maintenance of RPC nodes** across various blockchain networks, including Cosmos SDK app-chain, Aptos, and Sui.
- Help in building the **foundational architecture for a cross-chain bridge**, facilitating seamless interoperability between **Cosmos SDK** and an **EVM chain**.
- Conducted comprehensive **independent research on a multitude of blockchain projects**, successfully securing airdrops from renowned platforms such as **dYdX, ENS, Arbitrum**, etc.
- Received **full funding** to participate in the [Tether Plan B Summer School](#) program.
- Invited as a **panel speaker** at [Taiwan Builder House](#), shared experience on introducing Web3 technologies to university students.
- **Developed** the **backend** and **smart contract** for [AnyWay Network](#), a cross-chain payment gateway.

Club Experience

President of NTUT Blockchain Club, Taipei Tech, Taiwan

2022 ~ 2023

- Organized regular club events with insightful talks from renowned experts in Taiwan's blockchain industry, enriching student members' knowledge.
- Hosted engaging events like **Web3 workshops, meetups**, and networking sessions to promote collaboration and learning.
- Developed an [official club website](#) to showcase activities and resources.
- Collaborated with notable blockchain companies such as **Binance, SecuX, Chainlink**, demonstrating strong industry connections and commitment to fostering partnerships.

Skills

- Proficient in building server-side applications using **python**. And experienced in creating and managing RESTful APIs using **FastAPI**.
- Focused on EVM development, having honed skills in **Solidity** and possessing knowledge of ERC20, ERC721, EIP4361, and other relevant standards.
- Experienced with **Linux** and **Docker**, capable of quickly deploying applications on these platforms.
- Experienced with cloud platform such as **GCP, Azure, AWS** and **Cloudflare**.
- Familiar with **JavaScript** with a focus on integrating Web3 functionalities.

Language

- Native : **Cantonese, Mandarin** Fluent: **English**
